**Product Features:**

Changan Brand CNG model adopts the domestic leading CNG system, which has stable and reliable performance. It can realize the free switching between gasoline fuel and natural gas fuel according to the working conditions, making the engine performance more excellent, ECU emission control and OBD diagnosis more accurate, and meeting the actual driving needs; Imported automobile nozzle is adopted, which has fast response speed, stable operation and is not easy to be damaged; The valves of gas cylinders are equipped with fuel flow limiting devices, which can automatically close in case of leakage, rupture, fracture, etc. of the supply pipeline. The gas cylinders are installed outside the cab and equipped with special heat insulation devices and anti-collision devices, which can effectively reduce the impact damage to the side and rear of the vehicle and ensure the safety of the vehicle.

Packing and Shipping:

By Bulk

By Ro-Ro

By Frame

Container
